

FAASafety Flight Instructor Forum #3

Some of the deadliest accidents involving airplanes have occurred not in the air, but on the runway. This problem, though simple on the surface, requires all parties involved in airport operations to work together to create a safer, more vigilant environment. So, how do you teach airport surface safety? Are you using the best practices recommended by the FAA and industry experts? Do you demonstrate the common errors? Flight Instructors, Ground Instructors, Designated Pilot Examiners, and Instructors in training are welcome and encouraged to attend. Join your flight instructor colleagues and take an active role in improving safety in flight training! Please go to link below to see more details and to register on-line.

Directions: Please go to map link for directions.
